PROJECTS

cleanOps-project | React.js, HTML, CSS

20-12-2025

- Designed and developed the frontend of CleanOps, a React-based platform for managing community cleanliness operations with role-based dashboards for citizens, operators, and administrators.
- Implemented interactive UI components, including service request forms, request tracking, community project management, and dynamic analytics dashboards using React, React Router, and Recharts.

Task Planning AI Agent | ReactJS, Fast API, Groq (Llama 3.1)

30-01-2026

- Agentic System Architecture: Engineered an AI-driven backend using FastAPI and Groq, implementing structured prompting and agentic workflows to decompose complex user goals into hierarchical, actionable task plans.
- Secure Full-Stack Implementation: Architected a robust end-to-end solution featuring JWT authentication, SQLAlchemy persistence, and a React frontend, delivering real-time, Markdown-rendered AI responses for high readability.

Event Management System | ReactJS, ExpressJS, MongoDB

10-12-2025

- Engineered a full-stack Event Management web application using React.js, Node.js, Express.js, and MongoDB for event management, participant registration, and attendance tracking.
- Developed REST APIs, implemented database operations, and integrated frontend and backend to deliver a scalable event management solution.
